Official Communication from the merSETA and Moses Kotane Research Institute on Learner Stipend Disbursements

The merSETA and Moses Kotane Research Institute acknowledge the recent issues concerning delays in learner stipend payments. We deeply regret the inconvenience caused and are acutely aware of the impact on our learners' daily lives, Skills Development Providers and other stakeholders.

These delays have arisen due to unforeseen administrative challenges, which we are actively working to resolve. Please be assured that the welfare of our learners remains our foremost concern.

The Moses Kotane Research Institute (MKRI), in collaboration with merSETA, is committed to ensuring that all stipend disbursements are handled promptly and efficiently.

We are grateful for the patience and understanding demonstrated by our learners and all other stakeholders who may be adversely affected by the current situation.

For any further questions or support, please reach out to our team:
